### DETAILED ACTION

1. Claims 5 and 6 are pending in the instant application.

#### ***Claim Objections***

2. Claims 5 and 6 are objected to because of the following informalities:

Regarding claim 5, in line 3, the acronym "CDMA" should be defined in the claim, and, in lines 6 and 7, the parenthesis should be removed because it is unclear if the term(s) within them further limit the claim.

Regarding claim 6, the claims are objected to for the same reasons as applied to claim 5 above.

Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 5 and 6 are rejected as failing to define the invention in the manner required by 35 U.S.C. § 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The ***structure*** which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to *present a complete operative device*. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

5. Claims 5 and 6 are rejected under 35 U.S.C. § 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such

omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: the structural interconnections between the various claimed means.

6. Claims 5 and 6 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 5, the claim is indefinite because many of its limitations are lacking antecedent basis. The following terms are lacking antecedent basis:

In line 8, "the Walsh code"

In lines 9-12, "the sequency~frequency, even~cosine, and odd~sine correspondences" and "the DFT codes"

In lines 20-21, "the plurality of other codes"

In line 26, "the code input data vector"

Regarding claim 6, the claim is indefinite because many of its limitations are lacking antecedent basis. The following terms are lacking antecedent basis:

In line 8, "the real Walsh codes"

In lines 13-14, "the plurality of other codes"

In line 19, "the code input data symbol vector"

### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following prior art of record not relied upon above is cited to show the state of art with respect to orthogonal code generation.

U.S. Pat. No. 6317413 to Honkasalo.

U.S. Pat. No. 6674712 to Yang et al.
